MEICA Project Delivery | Water Industry | Electrical & Infrastructure

PROFILE

Experienced project delivery professional with a strong electrical background and recent experience supporting MEICA optimisation, refurbishment and asset improvement programmes within the UK water industry. Skilled in coordinating permits, third-party access, RAMS, stakeholder engagement, site activities and project documentation to support the safe and efficient delivery of wastewater infrastructure projects. Experienced in flow testing, capacity assessments, pumping station refurbishment, NRV replacement projects and tank cleaning operations.

CORE COMPETENCIES

MEICA Project Delivery • Wastewater Asset Optimisation • Pumping Station Refurbishment • Project Coordination • Contractor Management • Permit & Access Coordination • RAMS & Site Documentation • Stakeholder Engagement • Flow Testing & Capacity Assessments • NRV Replacement Projects • Tank Cleaning Supervision • PLC & SCADA Exposure • Health, Safety & Compliance • Scheduling & Work Planning

PROFESSIONAL EXPERIENCE

JACOBS ENGINEERING – Pump Optimisation Team (United Utilities)

Mar 2026 – Present

- Assisted in the delivery of a £2 million wastewater network optimisation programme supporting interventions projected to prevent more than 1,000 pollution and spill events.
- Supported the planning, coordination and delivery of optimisation interventions across wastewater infrastructure, contributing to environmental performance improvements, regulatory compliance and network resilience.
- Coordinated permits, third-party access requirements, RAMS, stakeholder engagement and site activities associated with pumping station refurbishment and optimisation projects.
- Supported flow testing, capacity assessments, NRV replacement projects, tank cleaning operations and wastewater asset performance improvements.
- Produced project documentation, supported scheduling activities and participated in pre-start meetings across multiple operational sites.
- Exposure to PLC and SCADA systems associated with wastewater asset operation and optimisation.

ERIC WRIGHT GROUP – Electrical / Project Support

Dec 2024 – Feb 2026

- Supported electrical and infrastructure projects across multiple operational environments.
- Assisted with project coordination, contractor liaison and site delivery activities.
- Maintained compliance with health, safety and quality requirements.
- Contributed to the successful delivery of works within programme and operational constraints.

QUALIFICATIONS & CERTIFICATIONS

- City & Guilds 2330 Level 2 & Level 3 Electrical Installation
- City & Guilds 2391 Inspection & Testing
- 18th Edition Wiring Regulations
- SMSTS
- EUSR Registration
- United Utilities Safety Passport
- CSCS Managers Card
- First Aid at Work (Current)
- MEWP (Cherry Picker) Licence
- Forklift Licence
- CAT & Genny Trained
- Full UK Driving Licence
- Additional qualifications, training records and certifications available on request.

ADDITIONAL INFORMATION

- Successful long-term vetting history and references on request
- Eligible for work within utilities, infrastructure, nuclear support and data-centre environments.
- Available throughout the North West, North Wales and neighbouring counties.
